

# WE ARE OPEN

**CDN**

## COVID-19 UPDATE:

We're all doing our best to cope with the challenges in the battle against Covid-19. Wisconsin's Governor has announced a "Safer At Home" executive order closing all non-essential businesses in the state.

Due to our position as a critical manufacturer of medical and laboratory equipment, supplier of components for agriculture and food supply, and manufacturer of equipment for law enforcement and Homeland Security, CDN is required to continue operating our fabrication facilities. We've also relocated several of our key development team members remotely with secure access and on-demand team conferencing. CDN is here to fill critical gaps in your supply chain and keep the economic engine running. We are open for business and here to help yours stay the same.

Let us know where we can help.

Design, Engineering and Product Testing	Sheet Metal Fabrication - Forming, Bending and Rolling	Welding - TIG, MIG and Robotic
Water Jet Cutting - Up to 8" Thick	RTV Molding	Woodworking
Laser Cutting - Co2, Fiber and Tube	Extrusions - Aluminum, Plastic and Rubber	Custom Tooling and Assembly Fixtures
Stamping	Vacuum Forming	Tube and Rod Bending
CNC Machining and Turning	Wet Coat Painting, E-Coat and Powder Coating	Injection Molding
Castings - Steel, Aluminum, Magnesium	Anodizing, Plating and Heat-Treating	Assembly, Warehousing and Distribution
Additive Manufacturing		3D Printing
