Pat on the Back Apparatus

Inventor: Ralph Piro

Publication Number: US 4,608,967

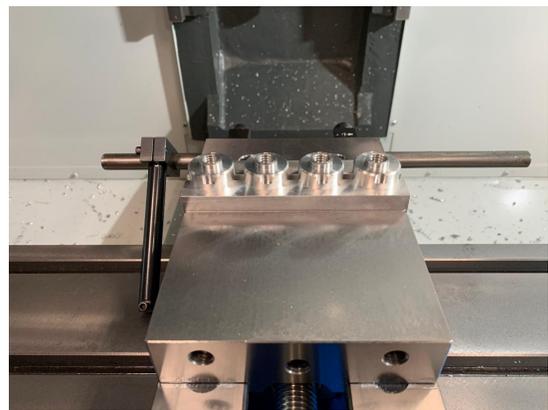

Product Description: No one around to congratulate you on a job well done? Introducing the Pat on the Back Apparatus, the perfect solution to boost your self esteem! The apparatus consists of having a simulated hand carried on a pivoting arm which sets over your shoulder. To operate the device, hold the rod (18) and tilt so that the supporting member (12) is angled to the appropriate position. With the other hand, grab the rope (28) and give it a gentle pull until the back receives a pat. Voila, a psychological lift!

Recent Project

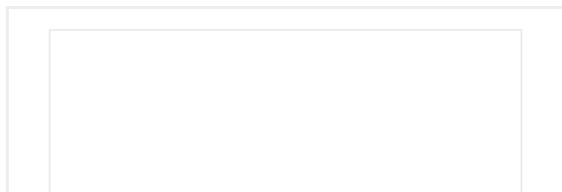

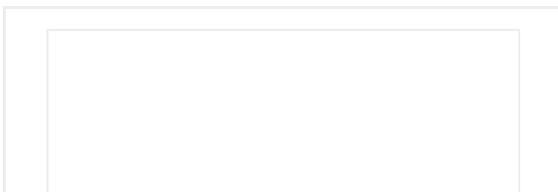

Throughout the years, the issue with flags furling and tangling in harsh weather has always remained a common issue. **The Avenue Flag** set was the first of its kind to incorporate a new design that prevents the flag from furling, guaranteed.

American Flags Express sought out CDN to help with the design, prototyping, testing, and manufacturing of the new pole. By utilizing our CNC lathe and machining center, we were able to quickly and efficiently get the flag pole into production.

ROLL FORMING PROCESS FROM CONCEPT TO PRODUCTION

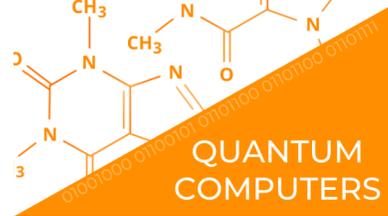

Roll Forming Process | Ultimate Guide 2020 | Concept to...

If sheet metal fabrication and aluminum extruding got together and had a baby, you'd get roll forming. Roll forming is like sheet metal fabrication where thin flat sheets of metal are bent into a 3D shape, but in contrast, these bends are formed...

Quantum Computers | What are Quantum Computers?

Truly strange and unexpected behaviors of subatomic particles have been discovered by science in the recent past - just the last about 50 years or so. Einstein's work predicted some of this, but even Einstein couldn't figure out if the theories...
